NEW DELHI 2 (INDIA) }  
The 14th May, 1951.

S. P. JAIN,

for Registrar General, India.

NATIONAL SAVINGS CERTIFICATES  
TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Ate now available in three different series, maturing after 6, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them inclusive of any Post Office cash certificates held.

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Shimla.

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 21st April 1951.

## Deaths from :-

\* In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

† Figures not available.

Explanation of symbols used :— B.—Births ; B. R.—Birth rate ; C.—Cholera ; S.—Smallpox ; P.—Plague ; F.—Fever ; D. D.—Dysentery and Diarrhoea ; R. D.—Respiratory Diseases ; M. D.—Maternal Deaths ; D. R.—Death Rate ; I. O.—Infantile Deaths (included in total deaths).

## REMARKS

The figures of births and deaths shown in this statement for the week ending the 21st April, 1951, relate to 185 towns with an estimated population of 25,128 thousands. The total number of towns is 234 and their population is 29,017 thousands. Thus 79% of the total number of towns representing 87% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 14,296 and 9,183 representing birth and death rates of 29·6 and 19·0 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 186 towns with an estimated population of 22,589 thousands. Information about Assam and Bihar could not be included. The total number of towns is 203 and their population is 25,187 thousands. Thus 82% of the total number of towns representing 90% of the total population is covered. The numbers of births and deaths recorded in these towns were 12,887 and 8,296 representing

birth and death rates of 29·7 and 19·1 per thousand of population respectively. The table at the end gives the position of States.

Malegaon in Bombay is the only town which had a high death rate of 53·8 per thousand of population and this high death rate was mainly due to deaths from fevers.

(B) States (Part B).—The data here relate to 19 towns with an estimated population of 2,539 thousands. The total number of towns is 32 and their population is 38,30 thousands. Thus 39% of the total number of towns representing 66% of the total population is covered. The numbers of births and deaths recorded in those towns were 1,409 and 887 representing birth and death rates of 28·9 and 18·2 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
